Circular No. 2/2018
Instructions to Appointed Examiners
Updating of Supplementary Action Sheet for Pressure Equipment Registration

Further to our Circular No. 1/2018, it is necessary to update the “Supplementary Action Sheet for Pressure Equipment Registration” by adding a new Check Code “PG” for exemption of pressure gauge which does not indicate the pressure in pascals or multiples of pascals.

“PG” in the section of Check Code is used for the pressure equipment applying for exemption from regulation 3(1)(a)(iii), 4(1)(c) or 5(1)(c) for pressure gauge not indicating pressure in pascals or multiples of pascals because the regulation cannot reasonably be applied. Completed application form for exemption (Form 5A), survey report and letter of recommendation from Appointed Examiner shall be sent with the Form 3 and this Supplementary Action Sheet for Pressure Equipment Registration for the Authority’s consideration.

Furthermore, “GB” in the section of Engineering Standards and Codes stands for GuoBiao Standards (國標) – China National Standards. In order to prevent confusion with other standards, description is revised to “PRC Standard/Code”.

The new form is attached with this Circular letter for your attention. With immediate effect, all Appointed Examiners please use the revised form for future submission.

For any queries, please feel free to contact the undersigned at telephone number: 31073440.
